

Developer Overview

Leadership Council Messages

1. AI Investment & Adoption

- **Leadership Support:** Leadership Council strongly supports AI initiatives.
- **AI-Powered Supply Chain:** (From Spencer Fung) Focus on leveraging AI to optimize our supply chain.
- **Competitive Landscape:** (From Victor Fung) Monitor competitor and their AI advancements.
- **OG Team Focus:** Each OG to dedicate 2 users to identify 3 AI agent use cases.

- **Strategic Approach:**
 - **Top-Down:** *Enterprise Agents*
 - Transform enterprise workflows to raise AI adoption
 - Enhance Lifung's competitive advantage
 - **Bottoms-Up:** *Self build agents*
 - Continue encouraging citizen developers to boost individual efficiency.
 - Cultivate problem-solving mindset

2. System Data Completeness

- **Pre-Order Focus:** Improving pre-order data completeness is critical for overall processes transformation.
- **Post-Order Status:** Post-order data quality is relatively good (XTS, MQC).
- **Mandatory Data Input:** New applications (Techpack, Sample, Fabric Library) will be mandatory to all new customers to ensure data completeness.

3. Opportunities - Pre-Order Capturing

- Explore and implement additional pre-order capturing systems to improve data quality and efficiency.
 - Upcoming BPM (Business Process Management)
 - Upcoming DTC enhancements

Practical considerations

- Day 0 / 1 / 2 mentality
 - **Day 0** - Bleeding edge - get wow factor: fast, magical *news*
 - **Day 1** - POC / MVP - apply in local use case: organic, flexible, ease to make
 - **Day 2** - BAU support - scale up & out: predictable, reliable, accountable
- POC is always *easy*, Production (scale up) is *hard*
